 - c. The Town Manager determines that the facilities correspond to the type(s) of park facilities, fire protection facilities, police protection facilities, or water and sewage facilities being impacted by the development as determined pursuant to this Chapter; and
 - d. The Town Manager determines, based on an analysis of supply and demand data, that the proposed park facility improvements, volunteer fire department facilities, police department facilities,

- and water and sewage facilities better meet the Town's need for such facilities than would payment of funds to mitigate the park, fire, police and water and sewage impacts of the development.
2. The credit against the impact fee shall be equal to the fair market value of the purchase, installation and/or improvement.
 3. Any applicable benefit factors that are demonstrated by the applicant not to have been included in the calculation of the impact fee.
 4. When the Town Manager has agreed to a developer's proposal to satisfy some or all of the impact fee through the purchase, installation and/or improvement of park, fire protection and police protection facilities, and water and sewage facilities, the developer shall prepare and submit a facility improvement plan to the Town Manager for approval prior to recordation of the final subdivision plats, and prior to issuance of a building permit for all developments not requiring approval of a subdivision plat.
 5. In the determination of credit toward the impact fee, the Town Manager shall also consider the extent to which the proposed dedication or conveyance meets the following criteria:
 - a. The land should result in an integral element of the Town park system, fire protection system, police protection system, or water and sewage system;
 - b. The land is suitable for future park facilities, fire protection facilities, police protection facilities, or water and sewage facilities;
 - c. The land is of an appropriate size and of an acceptable configuration;
 - d. The land has public access via a public street or an easement of an equivalent width and accessibility;
 - e. The land is located in or near areas designated by the Town on land use plans for park, trail or recreation purposes, for public buildings and volunteer fire or police department buildings; or water and sewage facilities;
 - f. The land has been surveyed or adequately marked with survey monuments, or otherwise readily distinguishable from adjacent privately owned property;

- g. The land has no known physical problems associated with it, such as the presence of hazardous waste, drainage, erosion, or flooding problems which the Town Manager determines would cause inordinate demands on public resources for maintenance and operation;
- h. The land has no known safety hazards;
- i. The developer is able to provide documentation, as nearly as practicable, of the land's compliance with the criteria of this subsection, and of clear title; and

The amount of credit determined pursuant to this subsection shall be credited proportionately among all the units in the development, and the impact fee for each unit for which a permit or approval is applied shall be reduced accordingly.

Applicants may not request that an impact fee credit be provided for a proposed development based upon taxes, user fees, assessments, improvements, payments or other benefit factors applicable to property that is not included within the proposed development.

§ 6-8. Payment of fees.

A. All developers shall pay an impact fee in accordance with the provisions of this Chapter, which shall be calculated by the Town at the time that the subdivision plat is ready for final approval by the Planning Commission.

B. The impact fee shall be recalculated if the application is modified or conditioned in such a way as to alter park impacts, volunteer fire department protection impacts, police protection impacts, and water and sewage impacts for the development.

C. A developer may obtain a preliminary determination of the impact fee before submitting an application for a development permit by providing the Town Manager with the information needed for processing. However, because impact fees are not subject to the vested rights doctrine, the fee actually paid by the developer will be the impact fee in effect at the time of building permit issuance, regardless of any preliminary determination.

§ 6-9. Time of payment of impact fees.

A. Payment of any required impact fees calculated as set forth in Section 6-9, above, shall be made prior to the signing of the final subdivision plat by the Planning Commission.

B. When a subdivision or development is conditioned upon the dedication of land, or the purchase, installation or improvement of facilities, a final plat shall not be recorded, and a building permit shall not be issued for development on the land to be subdivided until:

1. The Town Manager has determined in writing that any land to be dedicated is shown on the face of the final plat, and a deed conveying the land to the Town has been recorded with the Caroline County Clerk of Court; and
2. The Town Manager has determined in writing, after consultation with the designated public owner responsible for permanent, continuing maintenance and operation of the facilities, that the developer has satisfactorily undertaken, or guaranteed to undertake in a manner acceptable to the Town Manager, any required purchase, installation or improvement of the park or facility.

§ 6-10. Funding of projects.

A. An impact fee trust and agency fund is hereby created. The Town Manager and the Town Clerk/Treasurer shall be the fund managers. Impact fees shall be placed in appropriate deposit accounts within the impact fee fund.

B. The impact fees paid to the Town shall be held and disbursed as follows:

1. The fees collected for each project shall be placed in a deposit account within the impact fee fund;
2. When the council appropriates capital improvement project (CIP) funds for a project on the project list, the fees held in the impact fee fund shall be transferred to the CIP fund. The non-impact fee moneys appropriated for the project shall comprise both the public share of the project cost and an advancement of that portion of the private share that has not yet been collected in impact fees;
3. The first money spent by the Town on a project after a council appropriation shall be deemed to be the fees from the impact fee fund;
4. Fees collected after a project has been fully funded by means of one or more council appropriations shall constitute reimbursement to the Town of the funds advanced for the private share of the project. The public moneys made available by such reimbursement shall be used to pay the public share of other projects;
5. All interest earned on impact fees paid shall be retained in the account and expended for the purpose or purposes for which the impact fees were imposed.

C. Projects shall be funded by a balance between impact fees and public funds, and shall not be funded solely by impact fees.

D. Impact fees shall be expended or encumbered for a permissible use within six years of receipt, unless there exists an extraordinary or compelling reason for fees to be held longer than six years. The Town Manager may recommend to the Council that the Town hold fees beyond six years in cases where extraordinary or compelling reasons exist. Such reasons shall be identified in written findings by the Council.

E. The Town Manager shall prepare an annual report on the impact fee account showing the source and amount of all moneys collected, earned or received and projects that were financed in whole or in part by impact fees.

§ 6-11. Use and disposition of dedicated land.

All land dedicated or conveyed pursuant to this chapter shall be set aside for development of park facilities, volunteer fire protection facilities, police protection facilities, or water and sewage facilities, as the case may be. The Town shall make every effort to use, develop and maintain land dedicated or conveyed for such facilities. In the event that use of any such dedicated land is determined by the Town Council to be unfeasible for development of any such facilities, the dedicated land may be sold or traded for another parcel of land in the Town. The proceeds from such a sale shall be used to acquire land or develop such facilities in the Town.

§ 6-12. Refunds.

A. A developer may request and shall receive a refund when the developer does not proceed with the development activity for which impact fees were paid, and the developer shows that no impact has resulted.

B. In the event that impact fees must be refunded for any reason, they shall be refunded with interest earned to the owners as they appear of record with the Department of Assessment and Taxation at the time of refund.

C. When the Town seeks to terminate any or all impact fee requirements, all unexpended or unencumbered funds shall be refunded pursuant to this section. Upon the finding that any or all fee requirements are to be terminated, the Town shall place notice of such termination and the availability of refunds in a newspaper of general circulation at least two times and shall notify all potential claimants by first class mail at the last known address of claimants. All funds available for refund shall be retained for a period of one year. At the end of one year, any remaining funds shall be retained by the Town, but must be expended on projects on the Town's adopted plans. This notice requirement shall not apply if there are no unexpended or unencumbered balances within an account or accounts being terminated.

§ 6-13. Appeals.

A. Decision by Town Manager. The Town Manager shall issue a written decision on the impact fee amount as described in this Chapter.

B. Reconsideration by Town Manager.

1. In order to appeal the Town Manager’s decision, the developer shall make a written request to the Town Manager for a meeting to review the fee amount, together with a written request for reconsideration. The request for reconsideration shall state in detail the grounds for the request.
2. The Town Manager shall consider any studies and data submitted by the developer seeking to adjust the amount of the fee. The Town Manager shall issue a decision on reconsideration within 10 working days of the Town Manager’s receipt of the request for reconsideration or the meeting with the developer whichever is later.

C. Appeal of Decision on Reconsideration to Town Council. A developer may appeal the amount of the impact fee established in the Town Manager’s decision on reconsideration to the Town Council, which shall conduct a public hearing on the appeal.

1. An appeal of the impact fee as established by the Town Manager’s decision on reconsideration may be filed without appealing the underlying permit. If the developer files an appeal of the underlying permit and the impact fee, the appeals shall be consolidated.
2. The developer shall bear the burden of proving:
 - a. That the Town Manager committed error in calculating the developer’s proportionate share, as determined by an individual fee calculation, or, if relevant, as set forth in the impact fee schedule, or in granting credit for the benefit factors; or
 - b. That the Town Manager based his determination upon incorrect data.
3. An appeal of the Town Manager’s decision on reconsideration must be filed with the Town Clerk-Treasurer within 14 calendar days of that decision.

§ 6-14. Necessity of compliance.

A development permit issued after the effective date of the ordinance codified in this Chapter shall be null and void if issued without substantial compliance with this Chapter.

§ 19-13. Turn off of water supply to fire sprinkler system.

A. Where a fire sprinkler system is connected to the same water meter as other metered uses in a building and the service is turned off for nonpayment, the water supply to the sprinkler system will also be turned off. The Town shall not be liable for losses resulting from failure of the sprinkler system to operate.

B. Water service to fire sprinkler systems may be interrupted from time to time for emergency repairs or scheduled maintenance of the water distribution system. The Town shall not be liable for losses resulting from failure of the sprinkler system to operate during such times.

§ 19-14. Turn on/turn off fees.

The charge for turning off any water service, as well as for turning on any water service after suspension in service, is set forth in Table 1.

§ 19-15. Multiple billings.

When a structure containing multiple units is connected to the Town water system, each residential dwelling unit shall be considered a separate service regardless of the number of physical connections to the water and sewer main serving the structure. When two or more structures

owned by the same party are connected to the Town system, the water and sewer bills for such structures may not be combined into a single bill.

§ 19-16. Unoccupied buildings.

For billing purposes, a building or building unit connected to the Town water system shall be considered occupied until such time as the property owner shall pay the specified water turn off fee as set forth in Table 1 herein, and notify the Town office to turn off the water service.

§ 19-17. Estimated billing.

Where the meter is unable to be read or fails to register the total amount of water used, the customer shall pay for such period an estimated amount based upon the average consumption in similar periods. The customer shall notify the Town at once of any damage to or of any cessation in registration of, the meter as soon as he is aware of it.

§ 19-18. Partial billing period.

The Town, from time to time, may establish rates for water service that is provided during any portion of a billing period. In no event shall the user charges be greater than the normal user charges for the entire period.

§ 19-19. Abatement of sewer charges after water leak repair.

A. The sewer portion only of the excess charges above the 3-month seasonal average for a specific property may be abated if all of the following conditions are met:

1. The higher than normal usage is the result of leaking water that is not being sent through the wastewater system.
2. The high usage is not the result of outside water usage such as, but not limited to, lawn and garden watering, car washing, power washing and the like.
3. The leak has been verified by the Public Works Director and/or documented by a plumber licensed to work in Caroline County.
4. The leak has been properly repaired by a plumber licensed to work in Caroline County with written documentation of the repair submitted to the Town billing clerk, or the repair has been inspected and approved by the Public Works Director.
5. The abatement period shall be for a period not exceeding 60 days or two billing periods.

6. The request for abatement must be in writing and received by the Town billing clerk within 45 days of the billing having the excessive usage, except where it can be verified that the resident has been away for an extended period.

B. The sewer portion only of the charges for metered water used to fill a residential swimming pool may be abated if all of the following conditions are met:

1. The billing clerk and the Public Works Director are notified at least 3 days in advance of the pool filling.
2. The volume of water used can be determined by pool dimensions or meter readings (an extra charge may apply for reading the meter).
3. The fill rate and time of fill are approved by a designee of the Town.

C. Abatements, if approved, will be applied as a credit to the customer's account during the next billing cycle. The Town will not issue cash refunds.

§ 19-20. Restoration of service after turn off for nonpayment.

Water and sewer service turned off for nonpayment of the water and/or sewer bill shall be restored only after the past due account balance plus the turn off and turn on charges set forth in Table 1 have been paid in full unless a payment plan has been approved in accordance with subsection C below.

A. A turned off water service shall not be restored unless the property owner or adult occupant is present.

B. A turned off water service will be restored within 24 hours after payment is made whenever possible except that payments will not be accepted or services restored on weekends or Town holidays. Water service will only be restored between the hours of 7:30 a.m. and 3:00 p.m.

C. When a service is turned off or scheduled to be turned off for nonpayment and the Town Clerk determines that an extenuating circumstance or hardship exists, the Town Clerk may approve a payment plan to assist the customer with paying the past due balance. Any payment plan approved shall result in a declining monthly account balance. Water and sewer service may be restored as long as the customer complies with the terms of the approved payment plan.

ARTICLE VI. SERVICE INSTALLATION, METERS AND METERING

§ 19-21. Meters and metering.

A. For the purpose of determining the amount of water used, a water meter shall be installed at a point determined by the Town.

B. Where a residential customer desires to avoid paying sewer usage charges on water used exclusively for lawn irrigation, filling a pool, or other dedicated outdoor uses that do not return water to the sewer system a second isolated service meter may be installed in conjunction with the metered residential service provided that the fees set forth in Table 1 are paid.

C. For the purpose of determining the amount of wastewater generated, the metered water consumption shall be used.

D. Meters will be maintained by the Town as far as ordinary wear and tear is concerned, but the customer shall be responsible to the Town for any damage or loss of, any meter or meter pit arising out of or caused by, the customer's negligence or carelessness, or any person upon his premises under or by his consent or sufferance.

E. No one other than an agent of the Town or someone otherwise lawfully authorized so to do, may remove, inspect or tamper with the Town's meter, or other property of the Town on the customer's premises.

F. The customer is responsible for the installation and maintenance of service lines from the point of service connection to his premise. The point of service connection for water is generally considered to be the outlet side of the meter. The point of service connection for sewer is the end of the service lateral where the lateral enters the customer's premise.

G. In case of a disputed account involving the accuracy of a meter, the readings from such meter shall be monitored by the Town and the Town, in its discretion, will decide if the meter has a defect. If a defect is suspected, the Town may adjust the bill and/or replace the meter.

H. Structures having more than one dwelling unit or multiple non-residential users shall have a separate meter for each unit. The number and location of the meters and the design of the water service system is subject to the approval of the Town. Rates and charges for service to properties served by the meters will be as set forth in Table 1.

I. All meters, meter boxes, and meter cutoff valves and such other appurtenances as are furnished by the Town, or turned over to the Town under the terms of a development public works agreement, shall remain its property. All piping and appurtenances upon the customer's

premises must comply with and be installed and maintained in accordance with the requirements of the Town of Greensboro Building Code and the Plumbing Code of the State of Maryland.

§ 19-22. Meter installation.

A. The Town shall furnish with each permit for each water connection upon the payment of the required fee to cover all cost for water connection including the cost of a meter hereinafter prescribed, a water meter of a size and a type deemed by the Engineer to be suitable for the installation contemplated. The water meter shall remain under the ownership of the Town and will be maintained by the Town. To defray the cost of the supervision of the installation and maintenance of the meter the Town's connection fee shall encompass this amount as set forth in Table 1.

B. The Town's designee shall determine the size and type of any water meter and the type of location of settings. Outside meter settings will be used except where obstructions or other considerations require that the meter be placed inside the building, in which case they will be set as the Town's designee shall require. When the water meter is set inside the building the property owner will be held responsible for the protection of the meter from injury due to freezing and/or tampering. Repair and replacement of a meter so damaged shall be at the expense of the property owner.

C. The outside meter housing or the curb box must be installed so that top is on the ground surface of the permanent grade and within the public right-of-way whenever possible. In order to accomplish this, one (1) of the following methods will be followed:

1. Where the curb and sidewalk do not exist, the property owner shall indicate the final grade of the ground surface at which an outside meter setting or curb box is to be placed and the structure will be set at the grade given when it is installed. The water house connection shall not be installed until such grade is given. If the grade or location of the meter setting or the curb box is changed due to a change in elevation of the ground from that original indicated, the property owner shall bear the expense of such change in grade or location.
2. Where curbs and sidewalks are present, the top of the meter housing shall be placed at the straight line grade between the back of the curb and the street edge of the sidewalk.

D. The Town reserves the right to limit the size on any water meter to be installed.

E. If due to a change in the use or due to the installation of additional fixtures the owner requests a larger water building connection, the existing connection shall be discontinued and abandoned at the expense of the owner. The Town's designee will verify the adequacy of

meter size and any necessary additional installation or connections shall be at the expense of the property owner. If the Town's designee finds that an existing water connection is too small to serve the number of fixtures connected to it, the owner shall be notified of the need to install a larger water connection and larger meter. Failure to follow the Town's order will be considered a violation in this Chapter, and may result in disconnection of service.

§ 19-23. Customer access.

No customer (or his properly authorized agent), unless specially authorized by the Town, so shall open or close any of the stop cocks or valves in any mains or services owned and maintained by the Town.

§ 19-24. Transported water.

With the exception for water used for firefighting, fire protection or other public services, all water transported in tanks or vehicles of more than one hundred gallon capacity shall be metered and billed according to a rate established by the Town Council as set forth in Table 1.

§ 19-25. Authority of the Town's representative.

The Town's duly authorized representative, bearing proper credentials and identification, shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling and testing in accordance with the provisions of this ordinance and the laws of the State of Maryland.

ARTICLE VII. MAINTENANCE OF THE WATER AND SEWER SYSTEM

§ 19-26. Maintenance of systems and connections.

A. The Town will maintain all water and sewer services from the street main to the property line. The Town's responsibility for maintenance, repair, or replacement of any water or sewer fixture, connection or other apparatus shall be limited to those which are part of the public system or are located within the boundaries of a public way.

B. All pipes and appurtenances related to building water or sewer service on private property shall be maintained by, and at the expense of, the property owner. The Town, where it shall deem such action necessary, may perform maintenance or repair work on private property, in which case the cost, including overhead expenses, shall be paid by the property owner. Likewise, the cost of any work outside of the property line made necessary by the neglect or through action of a property owner or tenant may be charged to the property owner.

C. In the event of a complaint regarding a leak of water service, the Town will determine if the leak is in the public way, in which case the leak will be repaired by the Town. If

the Town determines that the leak is not in the public way and is not the Town's responsibility, the owner will be notified, and it shall be his responsibility to have the leak repaired at once by a master plumber at the owner's expense. If the property owner fails to make such repairs within five (5) days after written notification by the Town, the Town, in order to conserve water and protect the public health, will make such repairs as are necessary and will bill the owner for the costs of such work.

§ 19-27. Certain water discharges restricted.

No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water or unpolluted industrial process waters to any sanitary sewer.

§ 19-28. Discharge to storm sewers or natural outlets restricted.

Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers or to a natural outlet approved by the Town. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Town, to a storm sewer or natural outlet.

§ 19-29. Restricted water or waste discharges enumerated.

No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

A. Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas;

B. Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewer treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant;

C. Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment and personnel of the sewerage works.

D. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers or other interference with the proper operation of the sewage treatment works, such as by way of example, but not limited to: ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, manure, hair and fleshings, seafood waste, entrails and paper dishes, cups, milk containers, either whole or ground by garbage containers.

§ 19-30. Discharges which are harmful to sewers or facilities.

No person shall discharge or cause to be discharged the following described substances, materials, waters or wastes if it appears likely in the opinion of the Town that such wastes can harm either the sewers, sewerage treatment plant, or process or equipment, have an adverse effect on the receiving stream or can otherwise endanger life, limb, public or private property or constitute a nuisance. In forming its opinion as to the acceptability of these wastes, the Town will give consideration to such factors as the quantities of subject waste in relation to the flows and velocities in the sewers, materials of construction of the sewers, nature of the sewerage treatment process, capacity of the sewerage treatment plant, degree of treatability of wastes in the sewerage treatment plant and other pertinent factors. The substances prohibited are:

- A. Any liquid or vapor having a temperature higher than 150° F.
- B. Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of 100 milligrams per liter or containing substances which may solidify or become viscous at temperatures between 32° and 140° F. (0° and 60° C).
- C. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of $\frac{3}{4}$ horsepower (0.76 metric) or greater shall be subject to review and approval by the Town.
- D. Any waters or wastes containing strong acid from pickling wastes or concentrated plating solutions, whether neutralized or not.
- E. Any waters or waters containing iron, chromium, copper, zinc and other similar objectionable or toxic substances or wastes exerting an excessive chlorine or other disinfectant requirement, to such degree that any material received in the composite sewerage at the sewerage treatment plant exceeds the limits established by the Town for such materials.
- F. Any waters or wastes containing phenols or other taste-or odor producing substances in such concentrations exceeding limits which may be established by the Town, as necessary, after treatment of the composite sewerage, to meet the requirements of the state, federal, or other public agencies having jurisdiction for such discharge into the receiving waters.
- G. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Town in compliance with applicable state or federal regulations.
- H. Any water or wastes having a pH lower than 5.5 or higher than 9, or having any other corrosive property that may be hazardous to the Town system.
- I. Materials which exert or cause:

(i) Unusual concentration of inert suspended solids (such as, but not limited to, Fuller's earth, lime slurries and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride, and sodium sulfate).

(ii) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(iii) Unusual BOD, chemical oxygen demand or chlorine or other disinfectant requirements in such quantities as to constitute a significant load on the sewerage treatment works.

(iv) Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.

J. Prescription medications or other pharmaceutical products.

K. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewerage treatment processes employed, or are amenable to treatment only to such degree that the sewerage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

§ 19-31. Action by Town upon certain discharges.

A. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in § 19-29 and/or § 19-30 of this Chapter, and which, in the judgment of the Town, may have a deleterious effect upon the sewage treatment works, processes, equipment or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Town may:

1. Reject the wastes;
2. Require pretreatment to an acceptable condition for discharge to the public sewers;
3. Require control over the quantities and rates of discharge; and/or
4. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of this Chapter.

B. If the Town permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Town and subject to the requirements of all applicable codes, ordinances and laws.

§ 19-32. Amalgam Management at Dental Offices.

All dental offices and dental clinics shall conform to best management practices in the handling and processing of material containing amalgam and prevent the discharge of untreated amalgam into the wastewater system.

§ 19-33. Grease, oil and sand interceptors.

Grease, oil and sand interceptors shall be provided when, in the opinion of the Town, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts or any flammable wastes and/or other harmful ingredients, except that such interceptors shall not be required but are recommended for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Town and shall be located as to be readily and easily accessible for cleaning and inspection.

§ 19-34. Preliminary treatment or flow equalizing facilities.

Where preliminary treatment or flow equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

§ 19-35. Control structures and observation facilities.

When required by the Town, the owner of any property services by a building sewer carrying industrial wastes shall install a suitable control structure, together with such necessary meters and other appurtenances, in the building sewer or control structure to facilitate observation, sampling and measurement of the wastes. Such structure, when required, shall be accessibly and safely located and shall be constructed in accordance with plans approved by the Town. The structure shall be installed by the owner at his expense and shall be maintained by him so as to be safe and accessible at all times.

§ 19-36. Measurements, tests, and analyses.

All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this Chapter shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater, " published by the American Public Health Association, and shall be determined at the control structure provided or upon suitable samples taken at said control structure. In the event that no special structure has been required, the control structure shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage treatment works and to determine the existence of hazards to life, limb and property. (The particular analyses

involved will determine whether a twenty-four-hour composite of all outfalls of a premises is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended-solids analyses are obtained from twenty-four-hour composites of all outfalls, whereas pH's are determined from periodic grab samples.)

§ 19-37. Special agreements or arrangements.

No statement contained in this Chapter shall be constructed as preventing any special agreement or arrangement between the Town and any industrial user whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment, subject to payment therefor, by the industrial concern.

§ 19-38. Damaging, destroying or tampering with works; penalties.

No unauthorized person shall maliciously, willfully or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance or equipment which is a part of the sewage treatment works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct or for violation of any of the laws of the State of Maryland.

§ 19-39. Powers and authority of inspectors.

A. The Town and other duly authorized employees, or representative of the Town bearing proper credentials and identification, shall be permitted to enter all properties for the purpose of inspection, observation, measurement, sampling and testing in accordance with the provisions of this Section. While performing the necessary work on private properties referred to in this Section, the Town or its employees or representatives of the Town shall observe all safety rules applicable to the premises established by the company, and the company shall be held harmless for injury or death to the Town employees or representatives, and the Town shall indemnify the company against loss or damage to its property by Town employees or representatives and against liability claims and demands for personal injury or property damage asserted against the company and growing out of its gauging and sampling operation, except as may be caused by negligence or failure of the company to maintain safe conditions as required by this Chapter.

B. The Town and other duly authorized employees or representatives of the Town bearing proper credential and identification shall be permitted to enter all private properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the sewage treatment works lying within said easement. All entry and subsequent work, if any, on said easement shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

ARTICLE IX. USE OF WATER SUPPLY SYSTEM

§ 19-40. Use of Town's water system.

Water from the Town's system may be used for residential, business, industrial and public purposes. The Town reserves the right to impose at any time such restrictions on the use of water as, in its judgment, may appear necessary.

§ 19-41. Use of fire hydrants.

A. No person, other than an authorized employee of the Town or a member of a Fire Department acting under orders of his proper superior in the performance of his duties, may operate a public fire hydrant unless in possession of a permit from the Town to do so.

B. Public or private fire hydrants may not be used for flushing or for any other purpose except by special written permission of the Town, for the time and at the location specified. If such permission is granted, the water used shall be paid for by the user, who shall be charged for the water at the prevailing water rates.

§ 19-42. Approved water supply; plumbing fixtures and piping.

A. All buildings which are served with public water from the Town's system shall have approved water supply and plumbing fixtures and piping; where the same do not exist or are not of proper character, in the judgment of the Town, or are in a state of disrepair, they shall be provided, altered or repaired, as the case may be, in such manner as shall be required and within the time named, by notice served by the Town upon the property owner or occupant. No such building shall be hereafter erected in a location accessible to a public water main or sewer without being provided with adequate water supply and plumbing arrangements as required in this Ordinance.

B. The Town may at any time inspect existing plumbing systems and require such modifications as, in its judgment, may be necessary to put said plumbing in an approved, sanitary condition.

§ 19-43. Potable water supply systems; cross-connections.

A. Potable water supply systems shall be designed, installed and maintained in such manner as to prevent non-potable liquids, solids or gases from being introduced into the potable water supply through cross-connections or any other piping connections to the system.

B. Piping conveying potable water shall be constructed of nontoxic material and shall bear the National Sanitation Foundation ("NSF") certification. No chemicals or other substances

that could produce either toxic conditions, taste, odor or discoloration in a potable water system shall be introduced into or used in such systems. The interior surface of a potable water tank shall not be lined, painted or repaired with any material which will affect either the taste, odor, color or potability of the water supply when the tank is placed in or returned to service.

C. No physical connection or cross-connection shall be permitted between the public water supply and an industrial, fire or other auxiliary or emergency water supply source. This prohibition applies to all piping systems, whether inside or outside of any building or buildings.

D. Backflow or back-siphonage.

1. No plumbing fixture or device shall be installed which will provide a cross-connection between the Town's water supply and a drainage or sewerage system so as to permit or make possible the backflow of sewage or waste into the Town's water supply system; nor shall any such plumbing fixture or device be installed which will provide a possible cross-connection between the Town's water supply system and any well, spring, cistern, river or other private source of water supply. No water closet bowl shall be supplied directly from a domestic water supply system through a flush valve unless such valve is set above the water closet bowl in a manner so as to prevent any possibility of polluting the water supply and the valve is protected by an approved air-break or backflow preventer.

2. In order to prevent back-siphonage, all heating plants connected to the water system shall have a Town-approved check valve installed on the waterline supplying the plant, and the check valve shall be installed ahead of the plant's automatic water feeder or ahead of the boiler shutoff valve.

3. All humidifiers or similar devices having the water inlet below the overflow level shall be equipped with a Town-approved non-siphon ball cock.

4. Water which has been used for cooling or heating purposes shall not be reused for domestic purposes.

E. Soda, bar, laboratory, dental, medical, surgical and other appliances requiring either a waste or water supply connection are plumbing fixtures, and no such fixture may be connected to either a waste or water supply unless the said fixture is approved as free of any possibility of cross-connection or back-siphonage. Dental, surgical or other aspirators shall not be of the type operated by water pressure, unless equipped with a Town-approved vacuum-break device.

§ 19-44. Unlawful discharge of water into the streets.

A person may not empty, discharge, or cause or allow to be emptied or discharged from premises occupied by the person, directly or indirectly, to or on any of the public streets of the

Greensboro, a liquid other than rainwater flowing in its natural course. Notwithstanding anything to the contrary herein, car washing, and routine washing of sidewalks, buildings, patios, driveways or similar surfaces or structures shall be permitted.

ARTICLE X. SUPPLEMENTAL WATER AND SEWER REGULATIONS

§ 19-45. Adding or removing units in multi-unit structures.

A. When the total number of units or uses in a structure containing multiple units or users is reduced by combining units or downsizing the structure, any previously paid water and sewer connection and allocation fees shall not be refunded except as provided in Chapter. Basic water and sewer service charges will continue until the water meter(s) (where installed) for the corresponding down sized unit(s) are removed and the account paid in full.

B. When additional residential dwelling units or multiple non-residential users are added to an existing structure, such units shall not be connected to, or served by, the Town water and sewer system until the fees as set forth in Table 1 shall have been paid in full.

C. Failure to notify the Town when additional units or uses are added to a structure shall constitute a violation of this ordinance subject to the penalties set forth in this Chapter.

§ 19-46. Abandonment and expiration of service.

For the purpose of this section, a service shall be considered abandoned when no service, maintenance, or usage charges have been billed for five (5) years or the meter and service line have been removed. After abandonment and/or expiration of service, a property owner shall pay the applicable connection fees to have service resumed.

§ 19-47. Change of use after service is connected.

A. When an existing non-residential service or use is changed to a different service or use, the property owner shall pay an additional allocation charge, as applicable, for the additional anticipated usage in accordance with the Water Use Standards detailed in Appendix 1 and Table 1.

B. When an existing residential service or use is changed to a non-residential service or use resulting in an anticipated water usage in excess of two hundred fifty gallons per day (250 gpd) the property owner shall pay an additional allocation charge, as applicable, in accordance with the Water Use Standards detailed in Appendix 1 and Table 1.

C. No portion of previously paid allocation and connection fees shall be refunded if a use is downgraded to a use that uses less water.

ARTICLE XI. PENALTIES

§ 19-48. Unpaid charges to become lien upon property.

All rates, charges, fees and/or fines referred to in this Chapter shall constitute a lien on the real property served and shall be levied, collected, and enforced in the same manner as are Town real property taxes, and shall have the same priority rights, bear the same interest and penalties, constitute a lien on the real property so assessed, and be treated as Town real property taxes.

§ 19-49. Violation and penalties.

Any person found to be violating any provision of this Ordinance shall be a municipal infraction, the fine for which shall be \$200.00 for the first offense, and \$500.00 for each subsequent offense. Each day that a violation continues shall be considered a separate offense. In addition to said fine, the Town may request during the adjudication of an infraction that the owner(s) abate the violation, or in the alternative, permit the Town to abate the violation, and that all costs incident to the abatement shall be charged against the property owner, and shall constitute a lien on the property.
