Public Works-Dave Kibler

Dave stated that the USDA came today to take a tour of the WWTP. About 35 people were in attendance and they were impressed with what they saw. Dave went on to explain that he had told council about the money he would have left from the grant. The council had already approved the pick-up truck and lawnmower. He would like to now ask for the remaining funding to be put forth into a pole building that would be located at the WWTP. It would be 60x60, it would include the installation, heating and air for one area of the building, a bathroom, and the electric installation of the building. It would also include a lean-to on one side of the building for equipment to be parked under. The maximum expense of the building would be \$185,210. He is hoping to have even more money left over to cover the cost of water and sewer to be ran to the building. He will also use extra funds to purchase UV bulbs for the WWTP as well. Com. Mackey motioned to approve the purchase of the building with the understanding that the purchase and installation costs would not exceed \$182,210. Com. DeSimone seconded the motion. All in favor, motion passed. Mr. Kibler stated that he will try to have the other two quotes for council by the December meeting.

Ms. Delude stated that we would budget the funds, get an estimate and begin the bid process. Mr. Fletcher stated that if he could help in any way he would.
